# Welcome to OHG ONE HUB GLOBAL

## About Us

OHG365 is an innovative EdTech platform offering industry-ready online courses, coding terminals, tutorials, real-time challenges, and placement-driven training programs.

Our goal is to bridge the gap between learning and earning, empowering students and professionals with hands-on skills, real-world projects, and global career opportunities.

## WHY OHG?

Cutting-edge curriculum designed with  
industry experts

LMS with lifetime access

Global certifications

100% Placement  
Orientation

Live + Recorded sessions

Integrated Coding  
Terminals

Real-time challenges &  
hackathons

Portfolio & resume  
support

# COURSES OFFERED

Full Stack Java / Python

# Why SAP CPI is Best in Today's IT Landscape

SAP Cloud Platform Integration (SAP CPI) has become one of the most powerful and valuable capabilities in the modern enterprise IT ecosystem because it connects business systems, applications, and data into a single, intelligent digital flow. In an era where organizations rely on multiple SAP and non-SAP systems, seamless integration is no longer optional—it is mission-critical.

Unlike traditional integration roles that focus on limited point-to-point connections, SAP CPI professionals operate across the entire integration landscape. A SAP CPI consultant understands how different enterprise systems communicate, how data is transformed and secured, how business processes are orchestrated, and how integrations are monitored and optimized in real time. This end-to-end visibility enables them to design integrations that are scalable, reliable, and future-ready.

A SAP CPI expert works with APIs, message mappings, adapters, security protocols, and cloud services to ensure smooth data exchange between SAP S/4HANA, SuccessFactors, Ariba, third-party applications, and legacy systems. This holistic approach allows organizations to automate workflows, improve data accuracy, and achieve real-time business insights without system silos.

Because of this broad and in-demand expertise, SAP CPI professionals can design, build, test, deploy, secure, and manage enterprise-level integrations independently. They play a critical role in digital transformation projects, making them highly valuable, adaptable, and well-positioned for long-term career growth in the SAP ecosystem.

## More Career Flexibility & Job Roles

JOB ROLES	Package	Experience
<b>SAP CPI Integration Consultant</b>	₹4 LPA – ₹7 LPA	0-1 Years
<b>SAP Integration Developer</b>	₹4.5 LPA – ₹8 LPA	0-3 Years
<b>SAP Cloud Integration Engineer</b>	₹5 LPA – ₹9 LPA	0-2 Years
<b>SAP API &amp; Middleware Developer (CPI)</b>	₹5 LPA – ₹8.5 LPA	0-2 Years
<b>SAP BTP Integration Associate</b>	₹3.5 LPA – ₹6.5 LPA	0-3 Years
<b>Junior SAP CPI Consultant / Trainee</b>	₹3 LPA – ₹5 LPA	0-2 Years

## Module 01

### Introduction to SAP & Integration

- Overview of SAP ecosystem
- ERP, S/4HANA & Cloud basics
- What is system integration?
- Middleware concepts
- Role of SAP CPI in enterprises

**Outcome:**

- Understand SAP systems and integration fundamentals.

## Module 02

### SAP BTP Basics

- What is SAP BTP?
- Global account & sub-account
- Cloud Foundry overview
- Service subscriptions
- BTP cockpit navigation

**Outcome:**

- Gain basic knowledge of SAP BTP environment.

## Module 03

### SAP CPI Overview

- What is SAP CPI?
- CPI architecture
- Tenants & runtime
- iFlow concept
- CPI use cases

**Outcome:**

- Understand how SAP CPI works.

## Module 04

### CPI Design Tool & iFlow Basics

- CPI Web UI
- Integration flow designer
- Sender & receiver concepts
- Message flow steps
- Deploying first iFlow

**Outcome:**

- Create and deploy a basic integration flow.

## Module 05

### Adapters in SAP CPI

- HTTPS adapter
- SOAP adapter
- IDoc adapter
- OData adapter
- SFTP adapter
- Mail adapter

**Outcome:**

- Connect SAP & non-SAP systems.

## Module 06

### Message Mapping

- Message mapping basics
- Graphical mapping
- Standard functions
- Structure & field mapping
- Testing message mappings

**Outcome:**

- Transform messages between systems

## Module 07

### Content Modifier

- Headers, properties & body
- Dynamic values
- Expressions & variables
- Reusable integration logic

**Outcome:**

- Control and manipulate message data.

## Module 08

### Routing & Control Flow

- Routers
- Conditions
- Splitters & aggregators
- Sequential & parallel processing

**Outcome:**

- Design complex integration logic.

## Module 09

### Exception Handling & Monitoring

- Error handling concepts
- Exception subprocess
- Message monitoring
- Logs & traces
- Alerting

**Outcome:**

- Build stable and error-resistant integrations.

## Module 10

### Groovy Scripting in SAP CPI

- Introduction to Groovy
- Script step usage
- Custom logic implementation
- Handling XML & JSON
- Performance considerations

**Outcome:**

- Implement advanced custom integration logic.

## Module 11

### Security in SAP CPI

- Authentication & authorization
- OAuth 2.0
- Certificates & keystore
- User roles & access control

**Outcome:**

- Secure enterprise integrations.

## Module 12

### SAP CPI with S/4HANA

- IDoc integration
- OData services
- RFC connectivity
- SAP ERP & S/4HANA scenarios

**Outcome:**

- Integrate SAP systems with cloud applications.

## Module 13

### API Management & REST Services

- REST & SOAP APIs
- API lifecycle
- API proxy basics
- CPI & API Management integration

**Outcome:**

- Build modern API-based integrations.

## Module 14

### SAP PI/PO to CPI Migration

- Migration strategies
- Mapping migration
- Tool-based migration
- Hybrid integration scenarios

**Outcome:**

- Handle real PI/PO to CPI migration projects.

## Module 15

### Transport & Version Management

- Transport management
- Version control
- Dev → QA → Prod flow
- Best deployment practices
- Outcome:
- Manage enterprise CPI projects.
-

## Module 16

### End-to-End CPI Project

- Business scenario analysis
- Design & development
- Deployment & testing
- Monitoring & optimization
- Project documentation

#### Outcome:

- Become industry-ready with real-time SAP CPI experience.
